

IMPROVING STANDARDS IN YOUR SECTOR

FOOD & BEVERAGE

With ever-increasing emphasis being placed on the importance of cleanliness and preventing product contamination, the food and beverage industry is under constant pressure to comply with stringent standards of hygiene. Consequently, management personnel need to be able to demonstrate due diligence.

Hill Brush understands the challenges faced by this sector, from maintaining sanitary work surfaces, processing equipment and tools, to ensuring that proper cleaning practices are implemented and followed at all times.

Within the processing facilities, environmental factors such as high humidity as well as incomplete removal of organic residues support microbial growth. Mould that develops as a result in corners and grouting can cause food spoilage. An ever-present risk of cross-contamination must be controlled through the use of work area segregation, suitable storage of ingredients and appropriate cleaning, be this wet, dry or CIP. Stubborn residue must be removed from hard to reach areas, such as the inside of intricate pipework, in order to discourage the proliferation of bacteria.

A SELECTION OF THE MOST POPULAR PRODUCTS FOR YOUR SECTOR...

Soft Hand Brush B861RES

Crimped fill.
Ideal for: Very light particles; production lines.
Size: 317 x 36mm

Stiff Short Handled Brush D4RES

Ideal for: Production lines; catering, manufacturing use.
Size: 254 x 72mm
